

Physical Therapist Licensed in the State of Florida (Remote)

Job Description

About RehabBoost

RehabBoost is an early stage healthcare technology start-up company headquartered in Miami, Florida. Our patented software is an artificial intelligence (AI) body motion recognition proprietary platform that is transforming remote patient physical rehabilitation services. Our company offers a disruptive solution in the physical therapy industry that improves the patient's journey during rehabilitation, resulting in faster recovery times getting back to daily activities, work and exercise.

Description:

We are looking for a passionate, result-driven, creative, and collaborative candidate to fill the role of Virtual Physical Therapist. The Physical Therapist will utilize telemedicine services to create and implement an individualized program of physical therapy including the evaluation, assessment, treatment, planning, education, and communication to maximize a patient's progress toward achieving functional goals.

Roles & Responsibilities:

- As a Physical Therapist, you will perform comprehensive evaluations of patients' current physical conditions and past medical history to determine appropriate treatment plans.
- You will perform objective measurements to identify a patient's current status and quantify overall functional capabilities.
- You will perform assessments to provide effective treatment and care to patients with physical impairments, mobility limitations, or injuries.
- You will work closely with patients to develop patient specific treatment plans to improve their mobility, alleviate pain, enhance their overall quality of life, and return to their prior level of function.
- You will learn how to use the Rehab Boost app as a physical therapist to create treatment plans and onboard patients.
- You will teach patient's how to use the Rehab Boost app to improve patient compliance, communication, and overall patient outcomes.

Qualifications:

- Doctor of Physical Therapy degree from an accredited institution.
- Valid state licensure in the State of Florida.
- Proven experience, preferably a minimum of 2+ years in an outpatient setting.
- Ability to create and implement effective treatment plans.
- Excellent communication and interpersonal skills.
- Demonstrate leadership qualities, team player, a strong collaborator.
- High computer literacy and ability to learn new software platforms.
- Patient, active listener and problem-solver and an excellent analytical and logical thinker
- Compassion and empathy for patients experiencing physical limitations or pain management.
